RE: AB 222 (Adams) Energy: Biofuels -SUPPORT

Dear Senators Strickland and Negrete McLeod:
Chairman Fuentes:

Remediation Earth, Inc. strongly supports AB 222.

We are a privately held conversion technology company based in Simi Valley, CA that will convert post-recycled waste materials currently being landfilled, into clean renewable energy and alternative fuels. Our first facility will be located in a clean material recovery facility ("MRF") owned by Inland Empire Environmental in San Bernardino, CA.

We offer an environmentally friendly alternative to landfilling and incineration. Our technology complies with strict environmental standards, falling under the category of biomass resource recovery for beneficial use; reduces greenhouse gas emissions, and fosters resource conservation and pollution reduction.

We who live and work in California are aware of the projected growth of our population over the next 25 years and the added burden this will put on our overstressed landfills. Our utilities and fossil fuel supplies will undoubtedly fall short, so we need technologies like ours to augment the shortfall, in response to our ever-increasing population.

With the passage of AB 222 companies like ours that complement the recycling industry will not only be able to provide the additional energy and fuel needed, but will also generate green-collar jobs spurring the economic development our state so urgently needs.

Thank you for supporting AB 222

Daniel K. Moscaritolo
President and CEO
